AT THE UNIVERSITY OF UTAH

## EGI CONNECT

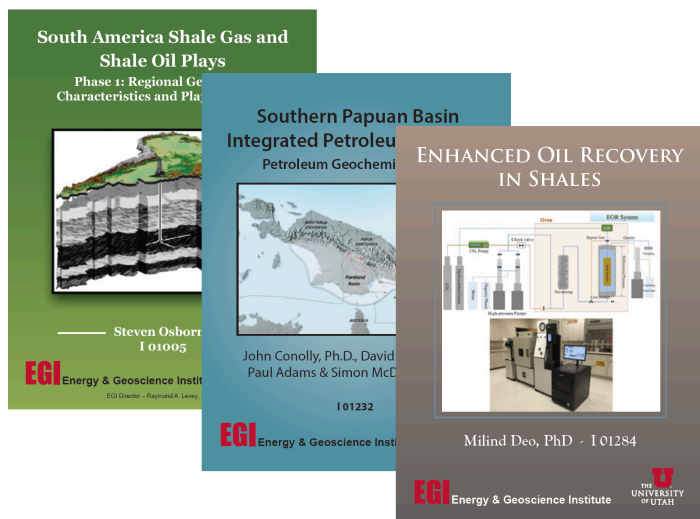

ONLINE GLOBAL DATABASE

### Access to Global Reports & Data

**EGI's corporate associate members gain immediate access to EGIconnect, our members only online database of EGI reports, technical documents, and on- and offshore data from study sites around the world.**

EGI adds new data, other technical reports, and new EG reports to EGIconnect regularly.

Scientific collaboration with industry specialists and corporate associates drives scientific innovation. Access knowledge that lowers the cost for exploration and enhances production.

#### Over \$850 million of research available for a fraction of the cost

EGI research projects are cost-shared collaborations between EGI's corporate associates, project sponsors, and partners. Completed project reports become available to all corporate associates after a confidentiality period.

#### 900+ Completed EGI Reports

EGI scientists conduct timely research on energy, minerals, environmental science, and engineering. Corporate associates have access to EGI's library of regional studies from global locations and thematic studies.

#### 4,000+ Well Logs

Well log images collected from global study sites around the world. EGIconnect contains both onshore and offshore well logs.

#### 350,000+ km 2D Seismic Data

Seismic data gathered from locations around the world. EGIconnect contains both onshore and offshore seismic data.

#### 18,000+ Technical Documents

EGI collects reports, articles, and other technical documents to compliment EGI's research studies.
