

iCORDS™ Offshore

Integrated Continent-Ocean Research Data System

Cloud Solution | Analytics Ready | Direct Web Access

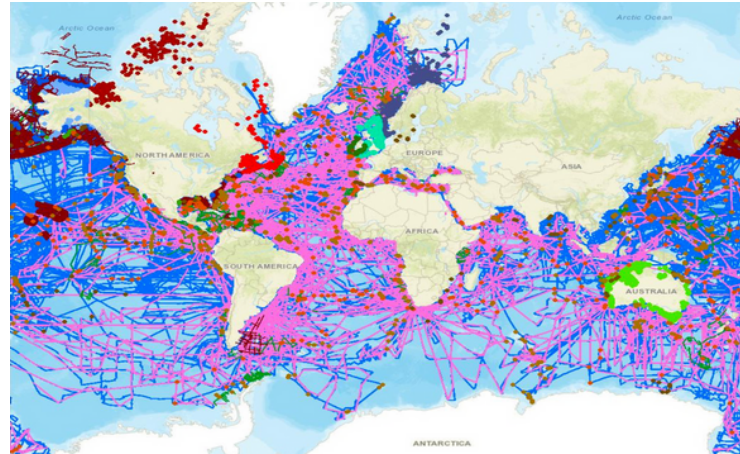

iCORDS Offshore is EGI's data analytics service integrating geoscience data on offshore basins and wells. The data have been harvested from various sources including DSDP-ODP-IODP and agencies from the United States, Canada, United Kingdom, Norway, and Australia.

- Integrating diverse geoscientific data repositories
- Global database curated for easy use
- Analytics ready with graphing capabilities
- Provides data for geochemistry and basin modeling
- A great tool at your fingertip for exploration and data screening
- Over 10 million geologic and geochemical data points from thousands of wells plus >5 million km seismic lines, 60,000 heat flow data, & supportive maps to contextualize the data

Spark Innovation through Aggregation

Our goal is to aggregate and standardize the global offshore data and make it universally available on a single platform.

Cost for Sponsors

iCORDS™ Offshore Module is offered on Google Cloud with an annual subscription.

1st Year: US \$30,000 EGI CA Members;
US \$40,000 non-CA Companies.

Subsequent Years: US \$20,000 EGI CA Members;
US \$30,000 non-CA Companies.

Note: Companies joining EGI or renewing their CA Membership in 2022-23 will get a 1-year free access to iCORDS™ Offshore.
